SUMMARY

Meta and Microsoft-certified Data Analyst with 3 end-to-end analytics projects (100,000+ records) across Python, SQL, and Power BI. Builds interactive dashboards, automated AI reporting pipelines, and predictive models; known for honest, decision-ready storytelling — quantified a **72% job-title pay gap** and proved attrition statistically unpredictable in current data (AUC 0.49).

CERTIFICATIONS

- Meta Data Analyst Professional Certificate — Coursera (May 2026) [Certificate Link](#)
- Microsoft Power BI Data Analyst – Advanced Visual Analytics [Certificate Link](#)
- Microsoft Excel (Advanced), with Copilot AI integration (July 2026) [Certificate Link](#)

TECHNICAL SKILLS

- **Excel:** Pivot Tables, VLOOKUP/XLOOKUP, Data Modeling, Copilot AI Features
- **Power BI:** DAX measures, Power Query ETL, Multi-Tab Interactive Dashboards
- **SQL (MySQL):** Joins, Aggregations, CTES, Window Functions — Roll-Rates, Cohorts, Decile Analysis
- **Python:** Pandas, NumPy, Matplotlib, Seaborn
- **Data Visualization & Storytelling:** Charts, Dashboards, and Reports for Non-Technical Audiences
- **Tools:** Jupyter Notebook, GitHub, Microsoft Office
- **Statistical Analysis:** Descriptive statistics, trend & correlation analysis, regression & classification metrics

PROJECTS

Employee Performance & Productivity Analytics | *Python (Pandas, NumPy, Matplotlib, Seaborn), Power BI (DAX, EDA, Visualisation)*

Project Link: [Click Here](#) Sep 2026

- Analyzed a workforce dataset of 100,000 employee records across 9 departments (2014–2024) with Pandas and NumPy — cleaned and standardized 15+ fields into an analysis-ready format; built 15+ HR KPIs and segment aggregates.
- Created 21 Matplotlib/Seaborn visualizations and a 4-tab interactive Power BI dashboard with DAX measures for non-technical stakeholders.
- Quantified a **72% job-title pay gap** (\$7,799 Engineers/Managers vs \$4,545 Technicians) vs ~0.2% gender gap, proved satisfaction did not predict attrition (stayed 3.00 vs resigned 2.99; flat 10.01% across segments), and isolated Performance–Salary as the only strong correlation ($r = 0.51$); delivered 6 retention and compensation recommendations.
- **AI version:** built an automated pipeline that regenerates an offline HTML dashboard, 16-page PDF report, 15-slide deck & 8-sheet workbook; trained Logistic Regression + Random Forest (attrition AUC 0.49 — honestly reported) and an OLS salary model ($R^2 = 0.99$).

E-Commerce Retail Sales & Customer Behavior Analysis | *Python (Pandas, NumPy, Matplotlib, Seaborn), Power BI (DAX, EDA, Visualisation)*

Project Link: [Click Here](#) Aug 2026

- Cleaned and standardized 12,180 e-commerce transactions — removed 180 duplicate orders, imputed missing values, unified country names; KPIs: **\$1.41M gross revenue**, AOV \$117.38, Repeat Customer Rate 88.47%, Delivery Success 54.82%.
- Built visualizations (sales trends, category & country revenue, payment breakdown, correlation heatmap) uncovering Q4 seasonality, 45% revenue concentration in 2 categories, and Middle-East city hubs (Abu Dhabi \$106K+).
- Recommended +40% Q4 inventory/ad-spend, bundling over blanket discounts (discount–revenue corr -0.07), and courier SLA audit to lift fulfilment above 75%; packaged into an executive presentation.
- **AI version:** reproducible scripts auto-generate the full PDF report, PPTX deck & cleaned dataset; 5-tab Power BI dashboard delivered for stakeholders.

EDUCATION

Bachelor of Arts (B.A.) — Shibli National PG College, Azamgarh, Uttar Pradesh (2021 – 2024)

Certified training in statistics & data analytics (Meta, Microsoft) | Languages: English, Hindi
